

LOGEtable

An intuitive and user-friendly chemistry table generator.

LOGEtable is a brand new table generator specifically designed to ease generation of detailed chemistry tables. LOGEtable is the latest addition to our simulation software LOGEsoft and works with your own chemical mechanisms and with LOGEfuel mechanisms.

The generated auto-ignition tables can be used in LOGEEngine or in LOGEapi's interfaces with CONVERGE v. 2.2.0_030416, 2.2.0_042916, CONVERGE v. 2.3.15, 2.3.17, 2.3.25 and GT-Power 2017.

The required simulation time can be up to two orders of magnitude shorter than with online chemistry.

COMPATIBLE WITH:

Windows 7, 8, 10 (64bit only)
Linux RHEL 6+ (64bit only)
